

Post Disposal is family owned and operated.

We believe in a foundation of customer service and hard work. We build long lasting relationships with our customers by partnering with them to meet their recycling needs and goals.

We value family, faith, our community, our employees and our business partners.

### Post Disposal Service

### Our recycling partners include:

**Zero Waste...**  
*the recycling of materials back into nature or the marketplace in a manner that protects human health and the environment...*  
**this is our goal.**

## Organics Waste Recycling

We collect organic materials that would otherwise be dumped in the landfill to recycle into nutrient rich compost.

Compostable materials include:

- ⇒ Food scraps (liquid or solid), coffee grounds, egg shells
- ⇒ Office paper and cardboard
- ⇒ Paper products such as paper plates, napkins, paper bowls, milk cartons, tray liners
- ⇒ Yard waste
- ⇒ Waste water from food production or sewage treatment
- ⇒ Wood debris from land clearing

## Construction & Demolition Recycling

Waste materials from construction sites are collected and source separated. Organic products such as untreated wood and drywall, and landscaping debris can be composted; while brick, concrete, glass, and scrap metals can be recycled with local vendors.

Post Disposal is an experienced disposal provider for LEED certified projects.

Building materials and landscaping/tree/dirt debris from demolition/site clearing can be recycled in a manner similar to the construction debris. It is source separated and composted or recycled. Wood waste and tree debris is chopped and shredded into mulch products which help support healthy plant-life and water preservation.

## Glass Recycling

We collect clear, blue, green and brown glass bottles and food containers. There is no need to separate colors, or to remove labels. Our business partners are provided 95 gallon polycarts to hold the recyclables until service day.

Post Disposal is the *local* choice for glass recycling services!
